NDC 64950-353-03

Always use the oral syringe provided to make sure you measure the right amount. Measure the dose of medicine from the widest part of the plunger. Do not measure from the narrow tip. Refer to figure and Medication Guide

- 1 Insert the tip of the oral syringe into the medicine bottle.
- 2 Pull back the plunger to the line that matches the dose prescribed by your doctor.
- 3 Remove the oral syringe from the medicine bottle.
- 4 Take your medicine by slowly pushing the plunger until the oral syringe is empty.

For your protection, this bottle has an imprinted seal around the neck.

Measure the dose from the widest portion of the plunger.

Do NOT measure to narrow tip of plunger.
